

DRAGON

ASPHALT SHINGLES

LARGE

Döcke DRAGON has a bigger shingle, which is 20% larger in total area than the regular laminated shingles of most manufacturers.

LUXURIOS

Döcke DRAGON provides exceptional roofing beauty, as the larger shingles look considerably more advantageous and attractive.

LAMINATED

Döcke DRAGON shingle lamination process not only gives multiple layers of protection but is designed to create a unique non-repeatable pattern.

UNIQUE LAMINATED SHINGLES

DÖCKE. MOVING FORWARD

Döcke Group has been one of the leaders in the European construction materials market for more than 17 years. Since entering the industry in 2005, the Company has succeeded in getting the reputation of a reliable supplier of premium-quality building products.

Three factories of the Holding successfully manufacture such materials as roofing shingles, bitumen membranes, vinyl siding, polymer facade panels, PVC and steel rain gutter systems and attic ladders. All produced goods invariably cause pride to

both its employees and the commercial partners of the Company – pride for the level of the products, pride for the positive feedback of the real estate owners who care for the design and reliability.

The quality of our materials and the utmost standards of customer service are two key things on which the Holding makes special emphasis. All plants use only state-of-the-art equipment, which is additionally tailored to modern construction trends and partners' needs. The most demanding quality control

completely meets the requirements of ISO 9001:2015 and exceeds them.

Over the years of work, Döcke brand has repeatedly and deservedly become the winner of many prestigious national and international awards, like "Brand of the Year/EFFIE", "Company of the Year", "European Standard", "Quality Mark", etc. The Holding intends to strengthen this position in the market and become one of the global leaders in its segment.
