Facade Panels

As safe as houses

Over 70 colors in 11 collections: stone, brick, marble, sandstone, slate

Facade and socle panels Döcke are wall exterior decoration material, designed to protect the facade of the building or its socle from the effects of climatic and environmental factors, as well as giving it a neat and complete look.

Döcke facade and socle panels are strong, beautiful and durable material that allows your house to acquire the look of a stone structure, but at a much lower cost.

This material belongs to the class of ventilated facades. It can be used both for complete facade decoration, and in combination with other materials.

Döcke facade panels are made of polymers by injection molding, which provides increased durability and guarantees a service life of at least 50 years.

Advantages of Döcke facade and socle panels:

- 11 collections, 74 colors.
- Panels' texture and volume imitate a natural stone and brick look.
- "Dry" construction - installation without the use of glue or cement.
- Lightweight facade reduces the load on the foundation, thus reducing the construction costs.
- No need of special care and painting.
- The color of each panel is individual.
- Panels are resistant to UV rays and precipitation.
- Panels are wind- and shockresistant, as well as resistant to deformation.
- Panels have increased stiffness and strength due to reinforced ribs.
- Unique patented panel fastening system.
- A special system for ensuring the necessary thermal clearances during installation.
- A perfect match with other Döcke materials.
- Warranty for the absence of deformation is 50 years.
- Color stability warranty is up 7 years.

OVERVIEW OF DÖCKE FACADE PANELS COLLECTIONS

PREMIUM series

Warranty against deformations - 50 years
Color stability warranty - 7 years

BERG Collection

- Imitates natural brick.
- 5 colors.
- Additional effect.
- Contrast colored gaps.

FELS Collection

- Imitates wild rock-hewn stone.
- 8 colors.
- Additional effect.
- Gaps colored same tone as the panel.

BURG Collection

- Imitates Jurassic marble.
- 11 colors.
- Additional effect.
- Gaps colored both in contrast and in tone of panel.

STERN Collection

- Imitates layered split sandstone.
- 7 colors.
- Additional effect.
- Gaps colored same tone as the panel.

STEIN Collection

- Imitates layered sandstone.
- 7 colors.
- Additional effect.
- Gaps colored same tone as the panel.

KLINKER Collection

- Imitates the narrow clinker latch brick.
- 6 colors.
- Additional effect.
- Contrast colored gaps.

STANDARD series

Warranty against deformations - 50 years
Color stability warranty -5 years

ALTAI Collection

- Imitates sandstone.
- 4 colors.
- Stuff-dyed.
- No additional effects.
- Gaps colored same tone as the panel.

FLEMISH Collection

- Imitates Flemish brickwork of smooth bricks.
- 6 colors.
- Additional effect.
- Contrast colored gaps.

SHALE Collection

- Imitates natural slate stone.
- 5 colors.
- Stuff-dyed
- No additional effects.
- Gaps colored same tone as the panel.

DUFOUR Collection

- Alpine collection.
- Imitates natural rocky stone.
- 11 colors.
- 5 stuff-dyed colors, 6 stuff-dyed colors with additional effect.
- Gaps colored same tone as the panel.

EDEL Collection

- Used for skirting finishing.
- Imitates layered sandstone with light-weighted structure.
- 4 colors.
- Additional effect.
- Gaps colored same tone as the panel.

BERG collection

BERG collection imitates natural brick and creates the effect of brickwork. The collection includes 5 classic colors of natural bricks. The texture, special coloring and contrast-colored seams are as close as possible to the natural material.

- Length: 1015 mm.
- Width: 434 mm.
- Panel area: 0.44 m².
- Quantity in a box: 10 pcs.
- Profile height: 17 mm.

Brown

Golden

Grey

Brick

Ruby

FELS collection

FELS collection imitates a 'wild' rock hewn stone. This collection includes 8 colors in the most popular shades. A large stone, taken as the basis of this panel, will give the house a volume. The joints are painted in the tone of the main panel.

- Length: 1052 mm.
- Width: 425 mm.
- Panel area: 0.45 m².
- Quantity in a box: 10 pcs.
- Profile height: 30 mm.

Terracotta

Ivory

Rye

Arctic

Nacreous

Rhinestone

Granite

Steel

BURG collection

BURG collection imitates the look of Jurassic marble and has a stone texture with a clear geometry. A range of 9 natural stone colors allows you to create a unique facade of the house. We also have panels with contrasting joints and those colored as the panel itself.

- Length: 946 mm.
- Width: 445 mm.
- Panel area: 0,42 m².
- Quantity in a box: 10 pcs.
- Profile height: 22 mm.

Flax

Sand

Dark

Wool

Ashy

Platinum

Wheat

Corn

White

Metallic

Silvery

STERN collection

STERN collection imitates layered split sandstone of different sizes. The color scheme of 7 hues has a special overflow, which gives the panels maximum compliance with natural stone masonry.

- Length: 1073 mm.
- Width: 427 mm.
- Panel area: 0.46 m².
- Quantity in a box: 10 pcs.
- Profile height: 25 mm.

Dakota

Marmaris

Marrakesh

Rhodes

Navajo

Antique

Seville

STEIN collection

STEIN collection imitates the texture of a layered sandstone and creates the impression of a natural masonry. Seven colors and a unique structure of STEIN collection are suitable for any house. The gaps are painted in the tone of the main panel.

- Length 1098 mm.
- Width: 400 mm.
- Panel area: 0.44 m².
- Quantity in a box: 10 pcs.
- Profile height: 25 mm.

Anthracite

Basalt

Dark walnut

Amber

Milky

Autumn wood

Bronze

KLINKER collection

KLINKER collection imitates the narrow clinker latch brick. This type of finishing material is popular throughout the world for many years. The collection includes 6 colors, each of which has several additional gradient effects.

- Length: 998 mm.
- Width: 406 mm.
- Panel area: 0.41 m².
- Quantity in a box: 10 pcs.
- Profile height: 21 mm.

Karakum

Sahara

Monte

Atacama

Kalahari

Colorado

FLEMISH collection

FLEMISH collection imitates Flemish brickwork made of smooth bricks. This type of brickwork looks austere and extraordinary. Accent white mortar joints will add color and contrast to the overall look. A special "burnt" effect makes the color of the panels as close as possible to a natural smooth brick. The collection includes 6 colors.

- Length: 1095 mm.
- Width: 420 mm.
- Panel area: 0.46 m².
- Quantity in a box: 10 pcs.
- Profile height: 17,4 mm.

Burnt yellow

Burnt red

Red

Brown

White

Yellow

SHALE collection

SHALE collection imitates natural slate stone, which was always actively used as a material for decoration purposes. It has a beautiful layered structure from a set of plates, combined together on a single SHALE panel. The collection includes 5 colors. Such panels will look very impressive on any building. The panels and corners are stuff-dyed without additional effects.

- Length: 930 mm.
- Width: 406 mm.
- Panel area: 0.38 m².
- Quantity in a box: 10 pcs.
- Profile height: 26 mm.

Courchevel

Val Gardena

Zermatt

Chamonix

Lech

DUFOUR collection

DUFOUR is an Alpine collection of Döcke facade panels that imitates rocky stone. Massive stones and accurate geometry of the panels and corners bring clean-cut lines and solidity to the facade. The 11 colors in the collection contribute to creating beautiful combinations. The DUFOUR collection was inspired by famous Alpine ski resorts. The panels and the corners are stuff-dyed.

- Length: 1014 mm
- Width: 424 mm
- Panel area: 0.43 m²
- Quantity in a box: 10 pcs.
- Profile height: 25 mm

Stuff-dyed

Stuff-dyed with additional effect

ALTAI collection

An intricate pattern of ALTAI panels with rough cleaved edges preserves the reliability and high decorative properties of natural split layered sandstone. The design of ALTAI panel matches that of STEIN but is stuff-dyed.

- Length: 1098 mm
- Width: 400 mm
- Panel area: 0.44 m²
- Quantity in a box: 10 pcs.
- Profile height: 25 mm

EDEL collection

Collection EDEL belongs to the class of socle panels, which are used for finishing the skirting of the building. They have a lightweight layered sandstone structure. The panels are made in 4 colors.

- Length: 945 mm.
- Width: 400 mm.
- Panel area: 0.38 m²
- Quantity in a box: 10 pcs.
- Profile height: 15 mm.

5 REASONS TO CHOOSE DÖCKE FACADE PANELS

1

DÖCKE – INDISTINGUISHABLE FROM STONE

The surface of Döcke panels is a perfect reproduction of the natural textures of stone and brick. The pattern of the panels is very realistic, and the three-step painting system creates an absolute illusion of natural materials. The result is a complete illusion of natural stone.

2

DÖCKE – WIDE PRODUCT RANGE

The product range of Döcke facade panels is very wide: stone and brickwork, marble and sandstone, slate and clinker. Over 70 colors in 11 collections. Everyone will find a solution to their liking!

3

DÖCKE – RATIONALIZED TO EVERY LAST DETAIL

In Döcke facade panels, everything is thought out to the last detail. The reinforced ribs provide additional strength and resistance to deformations of the panels, which means reliability and long service life. The patented "dovetail" end lock system allows to quickly and securely fix the panels on the facade and evenly distribute the load at the end joint of the facade panels. Special thermal tabs around the perimeter create a gap that compensates for thermal expansion. All of the above will make your facade reliable and durable.

4

DÖCKE DOES NOT SCRIMP ON QUALITY

Döcke traditionally focuses on the quality of its products, so it always uses the best equipment and materials. Only high-quality raw materials from the best world manufacturers are used in the course of production, such as Lechler, Renner, Master Tec, Reagens, Arcema, Dow, DuPont, Baerlocher. At Döcke factory the ISO 9001:2015 and IQNet quality management systems are implemented.

5

DÖCKE GIVES A REAL WARRANTY IN ALL CLIMATE ZONES

Döcke does not just declare a warranty - it actually provides customers with a branded warranty card. The warranty conditions apply in all climatic zones, unlike many other manufacturers. The guarantee is 50 years against deformation due to climatic factors and up to 7 years for color stability. Döcke's warranty is a base of confidence in its products quality and care for every customer.

We offer you a new level of living by creating stylish, high-quality and affordable exterior finishing solutions in conformity with the most demanding global standards.
